Complete list of collected data points

**General History:** referring provider, past medical history, alcohol use, tobacco use, “other”

**Obstructive Sleep Apnea (OSA) History:** current OSA therapy, previous positive airway pressure (PAP) therapy, previous oral appliance therapy (OAT), previous positional therapy, previously tried diet modification, previously tried weight loss, previously surgery for OSA, “other”

**General Sleep Symptoms:** time to fall asleep, symptoms of restless leg syndrome, average hours of sleep per night, sleeps on back, number of pillows used at night, “other”

**Nasal Symptoms:** nasal obstruction, nasal trauma, symptoms of nasal allergies, medications tried for nasal symptoms, “other”

**Intake Questionnaire:** is sleep apnea most important health problem, greatest concerns with OSA, most bothersome symptoms, sleep quality visual analog scale (VAS) (0-100), snoring VAS (0-100), Epworth Sleepiness Scale (ESS) (out of 24), Nasal Obstruction Symptom Evaluation (NOSE) (out of 100), Insomnia Severity Index (ISI) (out of 28), Functional Outcomes of Sleep Questionnaire-10 (FOSQ-10) (out of 20)

**Pertinent Review of Systems:** fatigue, bruxism, cardiovascular symptoms, respiratory symptoms, claustrophobia, “other”

**Physical Exam:** weight, body mass index (BMI), systolic blood pressure (SBP), diastolic blood pressure (DBP), peripheral capillary oxygen saturation (SpO₂), septal deviation, turbinate hypertrophy, maxillary vault abnormalities, mandibular vault abnormalities, tongue abnormalities, tonsillar abnormalities, Friedman score, “other”

**Polysomnogram (PSG):** apnea-hypopnea index (AHI), respiratory disturbance index (RDI), O₂ nadir, percent of total recording time with SpO₂<90% (%TRT<90%), “other”

**Plan:** drug induced sleep endoscopy (DISE), OAT, PAP, surgery, “other”
